Sanity CMS Schemas

01

```javascript
export default {
  name: 'car',  // Schema ka naam
  type: 'document',  // Schema ka type
  fields: [
    { name: 'name', type: 'string', title: 'Car Name' },  // Car ka naam
    { name: 'pricePerDay', type: 'number', title: 'Price Per Day' },  // Car ki daily rental price
    { name: 'availability', type: 'boolean', title: 'Availability' },  // Car ki availability
    { name: 'location', type: 'string', title: 'Location' },  // Pickup location
    { name: 'image', type: 'image', title: 'Car Image' },  // Car ka image
    { name: 'features', type: 'array', of: [{ type: 'string' }], title: 'Features' },  // Car ki features list
  ],
};
```

Sanity CMS Schemas

02

```javascript
export default {
  name: 'rental',  // Schema ka naam
  type: 'document',  // Schema ka type
  fields: [
    { name: 'carId', type: 'reference', to: [{ type: 'car' }], title: 'Car ID' },  // Car ID (referencing Car schema)
    { name: 'customerId', type: 'string', title: 'Customer ID' },  // Customer ka ID
    { name: 'startDate', type: 'datetime', title: 'Rental Start Date' },  // Rental start date
    { name: 'endDate', type: 'datetime', title: 'Rental End Date' },  // Rental end date
    { name: 'rentalDuration', type: 'string', title: 'Rental Duration' },  // Rental ka duration
    { name: 'totalAmount', type: 'number', title: 'Total Amount' },  // Total rental cost
    { name: 'status', type: 'string', title: 'Rental Status' },  // Rental status (e.g., confirmed, canceled)
  ],
};
```

Sanity CMS Schemas

03

```javascript
export default {
  name: 'location',  // Schema ka naam
  type: 'document',  // Schema ka type
  fields: [
    { name: 'name', type: 'string', title: 'Location Name' },  // Location ka naam
    { name: 'address', type: 'string', title: 'Address' },  // Location ka address
    { name: 'coordinates', type: 'geopoint', title: 'Coordinates' },  // Geolocation (latitude/longitude)
  ],
};
```

Sanity CMS Schemas

04

```javascript
export default {
  name: 'customer',  // Schema ka naam
  type: 'document',  // Schema ka type
  fields: [
    { name: 'name', type: 'string', title: 'Customer Name' },  // Customer ka naam
    { name: 'email', type: 'string', title: 'Email Address' },  // Customer ka email
    { name: 'phone', type: 'string', title: 'Phone Number' },  // Customer ka phone number
    { name: 'address', type: 'string', title: 'Address' },  // Customer ka address
  ],
};
```
